DETAILED ACTION

1. Applicants' amendment of 01/07/2005 is acknowledged. Claims 3, 9, 10 and 11 have been amended. Claims 1-13 are pending.

Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 3, 6, 7 and 8 are drawn to an isolated polypeptide and a method of making a peptide.

Group II, claim(s) 4 is drawn to an antibody.

Group III, claim(s) 5 is drawn to a method of binding to an antibody.

Group IV, claim(s) 9-13 are drawn to a method for reducing microbial concentration.

3. The inventions listed as Groups I- IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature-linking groups I- IV appears to be a Pep 714 related peptide having an amino acid sequence of SEQ ID NO: 6.

However, Larrick et al. (US 6,103,888) prior art of record teach a Pep 714 related peptide having an amino acid sequence of 100% identical to SEQ ID NO: 6 (see SEQ ID NO: 2, column 29 and figure 10). Therefore, the technical feature linking the inventions of groups I- IV does not constitute a special technical feature as defined by the PCT Rule 13.2, as it does not define a contribution over the prior art. As set forth above, each of group I- IV has a special technical feature that is not required for the other groups.

The special technical feature of group I is an isolated polypeptide.

The special technical feature of group II is an antibody.

The special technical feature of group III is a method of binding to an antibody.

The special technical feature of group IV is a method for reducing microbial

concentration.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Species Election

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

a. If applicants elect group IV, then there is additional election of species.

1a. please choose one of the species of microbial or viral from claims 12 or 13.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species are shown to be distinct because they are drawn to a plurality of disclosed patentably distinct organisms comprising structurally and functionally distinct molecules.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). The following claim(s) is generic: 1.

Art Unit: 1645
